

FireMon Solutions Expert Certification Class

BECOME A CERTIFIED FIREMON SOLUTIONS EXPERT

The FMSE certification is an effective way to validate your skills and show that you're qualified and properly trained in the administration and use of FireMon security solutions. This certification class will prepare you for certification and is offered both online and in the classroom. With your purchase of a training seat, you will receive one certification exam attempt, online access to our self-paced certification course, and hands-on experience to give training participants the opportunity to apply their knowledge in real-world scenarios. Our online sessions are delivered using Citrix GoToTraining.

MODULES COVERED IN THE CLASS

Classes are scheduled for 6 hours including a 1-hour lunch break and short breaks throughout.

Module 1: Introduction to the Security Intelligence Platform

- Main functionality of the platform.
- Ways that your organization can benefit from its use.
- Overview of server architecture and deployment options.

Module 2: Administration Overview

- Manage your license.
- Define users and permissions.
- Troubleshoot device connectivity.
- Configure compliance zones.
- Use the Server Control Panel.
- Run backups, restores and updates.

Module 3: Configuration Retrieval and Display

- View device configurations.
- Search and filter through data.

Module 4: Change Management

- Compare two configurations to identify differences between them.
- Run a change report to identify changes between configurations.
- Add documentation to track and manage changes.

Module 5: Reduce Policy Complexity with Usage Analysis

- Locate usage data and determine how it can reduce complexity.
- Run Traffic Flow Analysis to identify rules for improvement.
- Run Usage Analysis reports.

Module 6: Compliance Auditing

- Identify the different controls and assessments available.
- Create custom controls and assessments.
- Schedule and run assessments.
- Assign assessments to devices to automatically run.

FMSE CERTIFICATION FAQS

How do I become certified?

You must pass the online exam with a score of 75%.

How long is the certification good for?

The certification is good for Security Manager version 8. There will be a new certification when version 9 is released.

Where can I take the exam?

This is not a proctored exam, so you can take the exam online from your home or office. Please ensure that you are on a reliable internet connection before starting the exam.

How do I get access to take the exam?

The exam will be delivered through the FMSE online course. Course access can be requested through the User Center from the Training page under the Support tab.

How should I prepare for the exam?

Take the FMSE online course (only available for version 8) and work with all aspects of Security Manager and the Admin Center before taking the exam. Candidates that have used the product regularly (i.e., more than twice a week) for over 3 months seem to have the most success.

How many questions are on the exam and what is the time limit?

You have 90 minutes to answer 50 questions that are pulled from a question bank.

What is the cost of the exam and how much are retakes?

The first attempt is free with purchase of a seat in the FireMon Solutions Expert Class. Additional attempts can be purchased for \$100 through your FireMon account representative or sales@firemon.com.

How long do I have to wait to retake the exam?

A purchase order must be received and reconciled before the exam can be taken again. This can take up to 10 business days.
